

ReNova™ Authentic Restoration Window Glass

Our revolution in restoration window glass has begun!

Produced in Germany by SCHOTT exclusively for Hollander Glass and Bevel King Door and Glass Company, **ReNova™ Authentic Restoration Window Glass** captures the true old world look of blown window glass.

This machine drawn, fire-polished glass is a near perfect match to any fully mouth blown window glass that you will find. It exhibits a beautifully fluid, crystal clear waviness that is evident even in sizes small enough for kitchen and curio cabinets. Whether you are a homeowner looking to replace a modern window, door, or cabinet; or a furniture, door, or window manufacturer looking for a readily available authentic restoration window glass at a more affordable price, **ReNova™ Glass** will be the perfect choice! **ReNova™ Glass** is made in a special process that produces a consistent thickness of $\frac{1}{8}$ " (3.6mm +/- 0.5mm) and is fully temperable! Now you can achieve a genuine old world look in applications where tempered is required for entryway doors, interior doors, or sidelites.

Available in 3 high yield sizes:

41.7" x 61.4"

61.4" x 61.4"

84.7" x 61.4"
